

# AirFarm

**Direct-fired heaters**

**No heat exchanger means  
99% efficiency and  
less to go wrong!**

**Greenhouse  
gas fired heater!  
99% EFFICIENT**

Developed and produced in Italy with state-of-the-art manufacturing technology. **AirFarm offers a direct-fired system that is designed specifically for greenhouse applications.**

## **Features:**

- Developed and manufactured in Italy for TrueLeaf
- All stainless steel construction
- Water/dust proof electric box
- Burns fuel ultra clean
- Fuel: Propane and natural gas optimized for peak performance
- Fan failure warning light
- Multiple units can start up sequentially to prevent overload
- Safety features: overheat limit control, thermocouple flame sensor, inlet airflow pressure switch
- Optional remote thermostat available or control by computer
- High fan capacity: 3,500 cfm
- Low noise helicoidal fan
- Fan can be used alone for air circulation
- Use for CO<sub>2</sub> dosing
- Hooks for hanging and mounting from greenhouse

**Greenhouse Heating from TrueLeaf®**

**STIAL**

<b>Model</b>	<b>AirFarm 330</b>	<b>AirFarm 430</b>
Heat Output Max Btu/h	347,349	426,897
Air Output ft <sup>3</sup> /min	3,237	3,535
Motor Draw Watts	750	750
Amp Draw	6	6
Gas Pressure psi (inlet)	.29 (8" W.C.)	.29 (8" W.C.)
Voltage V-Hz	220-60 1 ph.	220-60 1 ph.
Weight lb	148	148
Dimensions (LxWxH) in	54x26x24	54x26x24
Air Outlet Dia. in	15	15
